

An Expert Session

on

“Laptop to Server, Code For customer”

Krishna School of Diploma Studies (KSDS) had organized an Expert Session on “Laptop To Server, Code For Customer” for the department of Computer Science & Engineering, Information Technology, Computer Engineering for diploma Engineering students.

This Expert Session was delivered by **Mr. Yash Patil** (platform Engineer, Laitmatus Software Pvt. Ltd., Vadodara).

Topic: “Laptop to Server, Code For Customer”

Date: 20th January 2026

Duration: 2 Hours

No. of Students: 200 Students

The objective of the expert talk on “**Laptop to Server: Code for Customer**” was to enhance participants understanding of the complete software development lifecycle—from writing code on a local system to deploying scalable, secure, and customer-ready applications on servers. The session aims to build practical awareness of how programming concepts, system architectures, databases, and deployment environments come together to deliver real-world solutions. It seeks to inspire problem-solving skills, promote industry-oriented coding practices, and familiarize participants with customer-centric development approaches. Additionally, the talk highlights best practices, challenges, and responsibilities involved in developing reliable applications, encouraging participants to transform academic coding knowledge into professionally deployable solutions that meet customer and industry requirements effectively.

Topics discussed were:

- From laptop coding to server deployment.
- Client–server architecture and customer-oriented application development.
- Database integration and server management.
- Security and privacy of customer data.
- Concurrency and handling multiple user requests efficiently.

Some glimpses of the Expert Session:

Feedback from Students:

Outstanding response was received from the participants. Students understand the actual meaning and importance of “Laptop to Server, Code For Customer”. This Expert Session served as a stepping stone for students.
