

# **Report on ideathon 2025**

**Organized by Innovation Club, Electrical Engineering Department, Government Engineering Collage Bhuj**

**Date: August 28, 2025**

**Venue: Electrical Department Hall**

The Innovation Club of the Electrical Engineering Department, Government Engineering College, Bhuj, organized an Ideathon on August 28, 2025 in the Electrical Department Seminar Hall. The event was arranged to help students share their ideas and think in a creative way. Many students from electrical department participated and showed interest in the event.

The aim of this Ideathon was to encourage students to think about new ideas and solve real-life problems. It also helped students improve their teamwork, speaking skills, and confidence while presenting their ideas in front of faculty members.

Six teams took part in the event. Each team explained their idea in front of the faculty members. After every presentation, teachers asked questions and gave helpful suggestions. The ideas were related to topics like technology and helping society.

Certificates were given to every participant to appreciate their effort and participation.

Overall, the Ideathon was a good learning experience for the students. It helped them think differently, speak confidently, and learn from teachers. The event was successful because of the support of faculty members and active participation of students.
