| <p>About the Event: DUHacks 5.0 is a national-level hackathon organized by GDG On Campus, Dharmsinh Desai University, and was conducted on 24–25 January 2026 in hybrid mode. This 36-hour innovation marathon brought together thousands of students from across India to collaborate, ideate, and develop impactful technological solutions. Participants worked on diverse domains such as Artificial Intelligence and Machine Learning, Web3, Fintech, Health, Space Technology, Education, and Innovation. The event focused on strengthening industry-academia collaboration by providing expert mentorship, technical workshops, and real-world problem statements. Through continuous guidance, interactive sessions, and hands-on development, DUHacks 5.0 aimed to enhance students' technical competence, creativity, and entrepreneurial mindset while fostering teamwork and leadership skills.</p> | | |
| <p>Outcome of the Event: DUHacks 5.0 proved to be highly impactful in promoting innovation, technical excellence, and professional growth among students. The hackathon encouraged inclusive participation from students of diverse regions, institutions, and backgrounds, enabling equal learning opportunities for all. Participants gained practical exposure to industry-standard tools, emerging technologies, and real-world development practices through mentoring, workshops, and challenge-based learning. The event strengthened problem-solving abilities, critical thinking, and collaboration skills while boosting participants' confidence in presenting and executing their ideas. Additionally, DUHacks 5.0 facilitated meaningful networking with peers, mentors, and industry professionals, contributing to long-term career and startup opportunities. Overall, the event successfully nurtured a strong, community-driven innovation culture and reinforced its position as a leading platform for student entrepreneurship and technological advancement.</p> | | |
