

Event Title

Event Name: SSIP 2.0 Sensitization Programme for 3rd Sem Student of Civil Engineering

Date: 28th July 2026 (Tuesday)

Venue/ Mode: Computer Lab (Offline)

No of Participants: 44

Speakers Name: Shri J.T. Patel

About Event: A Sensitization Programme on the Student Startup and Innovation Policy (SSIP) was organized for the students of the Department of Civil Engineering to create awareness about innovation and entrepreneurship. The session introduced the objectives and benefits of SSIP, including financial support, mentoring, incubation facilities, and intellectual property (IP) assistance. Students were informed about the process of idea submission, project evaluation, prototype development, funding, and startup registration. The resource person also shared success stories of student innovators to inspire entrepreneurial thinking. The programme encouraged participants to identify real-world challenges in civil engineering and develop innovative, technology-driven solutions.

Outcome of Event: The sensitization programme successfully enhanced students' awareness of the Student Startup and Innovation Policy (SSIP) and its support mechanisms. Students gained a clear understanding of innovation, entrepreneurship, startup development, funding opportunities, incubation support, and intellectual property rights. The session motivated participants to identify real-world problems and develop innovative, technology-driven solutions in civil engineering. It also encouraged students to transform their ideas into prototypes and startups while actively participating in SSIP activities and innovation competitions. Overall, the programme fostered an entrepreneurial mindset and strengthened the culture of innovation within the department.
