About the Event: An Entrepreneurship and Innovation program was conducted on 09/07/2026 for the students of Sem V of I.C department.

The purpose of this program was to make the students aware about Entrepreneurship and Innovation.

Students were about How an Idea can be converted In to an Invention? How an Invention can be converted in to an Innovation? Students were explained about the topics like entrepreneurship. role of an entrepreneur in the society , Strength , Weakness , Opportunity and Challenges locally and globally faced by entrepreneurs etc. Students, were encouraged to have their own startups, and were informed how to develop innovative solutions, and explore business opportunities.

Typical objectives include:

- Encouraging creative thinking, critical thinking and problem-solving.
- Promoting startup culture and entrepreneurship.
- Showcasing innovative products, projects, or business ideas.
- Developing Ideas, working together as a team, and developing business planning skills.

Outcome of the Event:

- Identification of needs and wants of Human being globally and locally
- Development of innovative business ideas
- Collobaration with the Stake holders
- Potential startup incubation and funding opportunities
