Organizing department / Faculty	:	Department of Electronics and Communication
Speaker's Name and designation	:	Dr Ashish Pandya, Associate Professor

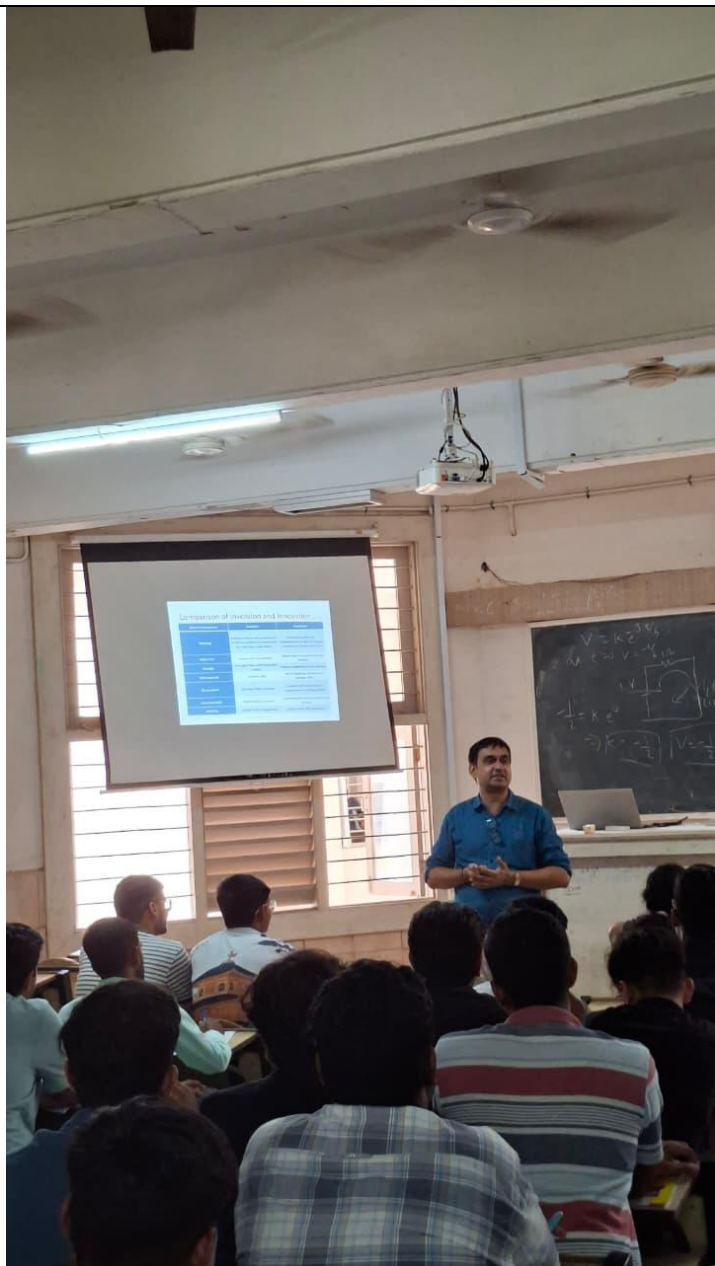

About the Event:

The SSIP Sensitization Seminar was organized for Second Year B.Tech. EC Sem.V students to create awareness about innovation, entrepreneurship, and startup opportunities available under the Student Startup and Innovation Policy (SSIP) of DDU. The seminar introduced students to the SSIP ecosystem, including mentoring, financial support, incubation facilities, project development, and innovation-related activities. Students were also sensitized to innovation, novelty, intellectual property rights, and patents, encouraging them to develop their academic ideas into innovative projects, prototypes, and potential startup ventures.

Outcome of the Event:

- Students gained awareness about SSIP activities, innovation, entrepreneurship, and startup opportunities available at DDU.
- Students developed a basic understanding of innovation, novelty, intellectual property rights, and patent protection for their ideas and projects.
- Students were motivated to identify innovative ideas, develop prototypes, participate in SSIP activities, and explore opportunities for converting their projects into viable startup ventures.
- Students understood the importance of problem identification and need-based innovation in developing practical and socially relevant solutions.
- Students became aware of the importance of protecting their innovative ideas through appropriate intellectual property mechanisms before commercialization.
- The session encouraged students to actively participate in innovation competitions, workshops, hackathons, and other SSIP-supported activities to enhance their technical and entrepreneurial skills.
