

Vishwakarma Government Engineering College, Chandkheda

EVENT SUMMARY REPORT

SSIP 2.0, IIC & Entrepreneurship Cell Awareness Session

Date of Event: August 12, 2026

Organizing Department: Information Technology

Conducted by: Prof. Chetna G. Chand

Venue: B202

1. Executive Overview

On August 12, 2026, the Department of Information Technology organized an awareness session in B202 on the institutional innovation and entrepreneurship ecosystem. The session introduced students to three key support mechanisms - the Student Startup and Innovation Policy (SSIP 2.0), the Institution's Innovation Council (IIC), and the Entrepreneurship Cell (E-Cell). Prof. Chetna G. Chand explained how students can transform academic or technical ideas into proof-of-concept solutions and progress toward innovation, incubation, and entrepreneurship.

2. Core Ecosystem Pillars & Key Initiatives

- **SSIP 2.0 Framework:** Students were introduced to mentoring, financial assistance, proof-of-concept support, prototyping facilities, and guidance available for developing innovative student projects.
- **Institution's Innovation Council (IIC):** The role of IIC in promoting innovation, design thinking, problem solving, intellectual property awareness, mentoring, and participation in innovation-focused activities was discussed.
- **Entrepreneurship Cell (E-Cell):** Students were briefed on entrepreneurship opportunities, startup culture, team building, pitching, networking, and the support ecosystem available for converting ideas into viable ventures.

3. Key Session Outcomes & Impact

The session helped students understand the pathway from ideation to prototype development and startup support. Key outcomes included:

- **Awareness of Institutional Support:** Students gained clarity about mentoring, prototype development assistance, incubation support, and available innovation schemes.
- **Idea-to-PoC Roadmap:** Participants understood how an academic project or problem statement can be refined into a proof of concept and further developed through the SSIP ecosystem.
- **Innovation & Entrepreneurship Orientation:** The session encouraged students to participate in IIC and E-Cell activities, form interdisciplinary teams, and explore entrepreneurial opportunities.
- **Student Engagement:** Students interacted during the session and raised questions related to funding, mentoring, prototype support, and startup participation.

4. Next Steps & Recommendations

Students may be encouraged to submit innovative ideas for mentoring, participate in IIC and E-Cell activities, and approach the departmental/SSIP coordinators for support in developing proof-of-concept models. Follow-up sessions on design thinking, intellectual property rights, prototype development, and startup pitching can further strengthen student participation in the innovation ecosystem.
